

Meeting Script

Your message to the MP is simple-----

We know that Kirsty Duncan put through a private Member's Bill C221, and she cannot have another bill debated in this Parliament- We need the Parliament to adopt this Bill and make it government legislation. We need you to support this Bill. Ideally, we would like you to write a letter to the Minister of Health, asking that PMB C221 be adopted as government legislation.

At the meeting--

- ✓ Tell the MP a bit about SCD or Thal. Stress the fact that the disease needs a national strategy.
- ✓ Let the MP know that the Bill was drafted with help from the medical professionals, advocacy groups, patients that deal with the disease and know that a federal strategy is the solution to improved care and treatment.
- ✓ Many petitions have been signed. We have a good Bill. Our people want it. We need you to support and the Government to adopt it.
